

Harshith Babu Dangeti

Entry-level AI Full Stack Dev

✉ harshamohar@gmail.com ☎ 9100777342 📍 Hyderabad, Telangana, India

01 PROFILE

Results-driven Computer Science student with practical experience engineering full-stack applications using Python & JavaScript. Proficient in applying software development lifecycle principles, building scalable RESTful APIs, and implementing containerized deployments with Docker. Demonstrated ability to collaborate in team environments to design relational databases and responsive user interfaces. Seeking a Software Engineering position to leverage strong foundational computer science theory, learn new enterprise frameworks, and contribute high-quality code to impactful production environments.

02 TECHNICAL SKILLS

Programming Languages & Core

JavaScript (ES6+), HTML5, CSS3, Python, SQL (Structured Query Language)

Back-End & API Design

Node.js, Express.js, Flask, RESTful API Design, Framework Routing

Cloud & DevOps Engineering

Amazon Web Services (AWS), Azure, Docker (Containerization), AKS (Azure Kubernetes Service), CI/CD (TeamCity Pipelines)

Front-End Development

React.js, Redux, React Router, UI Responsive Design

Databases & Data Modeling

PostgreSQL (Relational Systems), DBeaver

Development Tools & Methodologies

GitHub, Jira (Agile/Scrum), Figma, VS Code, Postman API Testing

03 PROFESSIONAL EXPERIENCE

Full Stack Developer

Criska Business Consulting

02/2026 – Present
Hyderabad

- Promoted from intern to Full Stack Developer and served as a client-facing engineer, liaising with stakeholders to define requirements and deliver features.
- Developed responsive React applications and reusable components, improving UI consistency and development speed.
- Built and maintained Node.js/Express back-end services and PostgreSQL databases, implementing RESTful APIs and robust data models.
- Delivered a complete full-stack Habit Tracker application independently, including authentication, CRUD operations, and responsive design.

04 PROJECTS

Chatbot Developer

Human-Computer Interaction Project

Technical Stack: Python, NLTK, ReactJS, Docker, Amazon Web Services (AWS), REST API, Tkinter, Git, Linux

- Engineered an independent conversational AI agent applying Human-Computer Interaction (HCI) principles to automate text-based information retrieval pipelines.
- Developed custom rule engines and Natural Language Processing (NLP) workflows using Python and NLTK for tokenization, lemmatization, and pattern matching. [1]
- Designed a responsive user interface with ReactJS and integrated a local fallback GUI using Tkinter to manage real-time user input/output streams.
- Architected full-stack deployment by containerizing the application via Docker and provisioning scalable cloud infrastructure on AWS.
- Implemented RESTful API endpoints to establish modular communication and seamless data exchange between the backend engine and frontend layers.

Full-Stack Habit Tracker App

Personal Project

Technical Stack: React, Node.js, Express.js, PostgreSQL, RESTful APIs, Git, SQL, Postman [1, 2]

- Architected a responsive full-stack web application featuring real-time data visualization for tracking daily and weekly user habit progress. [1, 2]

- Engineered a custom streak tracking algorithm to calculate consecutive event completions, optimizing dynamic data updates and progress tracking.
- Designed and optimized a normalized PostgreSQL database schema to efficiently manage relational user data, complex habit logs, and activity histories.
- Developed scalable RESTful API endpoints utilizing Node.js and Express to handle secure CRUD operations, habit updates, and streak computations. [1, 2]
- Implemented state management principles on the frontend with React to ensure seamless, low-latency UI updates during database read/write cycles. [1]

05 SKILLS

- | | |
|-------------------|----------------------------------|
| • Adaptability | • Ability to Work Under Pressure |
| • Time Management | • Management |
| • Fast Learner | • Communication Skills |

06 EDUCATION

Bachelor of Technology(B.Tech) in Computer Science Engineering ICFAI University CGPA - 7.1(Under Graduate)	08/2022 – Present Hyderabad
Intermediate MPC Sri Chaitanya junior College Percentage - 93.4%	07/2020 – 05/2022 Chaitanyapuri, Hyderabad
SCHOOLING Sri Chaitanya Techno School Percentage - 100%	06/2019 – 05/2020 Vanasthalipuram, Hyderabad

07 CERTIFICATIONS

AWS Academy Cloud Foundations Issuer: Amazon Web Services Date: 2025-04	Data Processing and Visualization Issuer: NASSCOM Date: 2024-02
Exploratory Data Analysis Issuer: NASSCOM Date: 2023-10	Onramp – MATLAB Issuer: MathWorks Date: 2024-01
